

Vanguard Instruments Company, Inc.

CT-8000

The CT-8000 is Vanguard's fifth generation, stand-alone, microprocessor-driven EHV circuit-breaker analyzer. This easy to use analyzer is available in models with either 3 (CT-8000-3) or 6 (CT-8000-6) dry-contact inputs. Both models feature three digital travel transducer input channels. The CT-8000 can operate either in Time-Travel analyzer mode or in Quick-Shot mode (for on-line timing).

The CT-8000 has been in production since 2006.
